DXC InAttendance for Cornerstone OnDemand
Attendance-tracking integration

Business case

Whether you need to log employee attendance at instructor-led training (ILT) or more informal on-the-job learning sessions, you can significantly cut administrative time and track attendance faster and more accurately than ever with DXC Technology's InAttendance for Cornerstone OnDemand.

With DXC InAttendance you can:

- Scan users into class using your existing badges containing a learner's unique identification information
- Smoothly combine the tracking of live and virtual attendees into one system by allowing virtual pin code attendance
- Increase the reliability of completion records for compliance courses while minimizing errors
- Change the Kiosk design for each training

Key features

- **Supports multiple training types:** ILT sessions, Online Courses, Materials, Tests
- **Compatible with most badges** including: RFID, bar code, magnetic strip or QR code
- **Real-time integration** with Cornerstone
- **Seamless user experience** for instructors from Cornerstone
- **Virtual attendee** attendance tracking

Key benefits

- **Time and cost savings** through smart process automation
- **No more excel spreadsheets** or paper logs to upload
- **Faster and more accurate attendance** tracking and completion monitoring
- **Quick Implementation**, no training required
- **Hybrid training** attendees tracked together

Training is created in Cornerstone LMS	Attendance roster is updated and submitted manually or automatically

Instructor finds desired training in Cornerstone LMS	Learner scans badge or enters pin code and is registered for the training	Instructor reviews log and bulk marks attendance

Requirements

To set up and operate DXC InAttendance for Cornerstone, you will need the following technical requirements:

- Cornerstone LMS
- Cornerstone's Reporting and Foundational APIs with Outbound Single Sign-On
- If applicable a device in each classroom that has internet access for kiosk
- If using badge scanning, tracking device must contain each learner's unique identifier that corresponds to a user field in Cornerstone
- If using badge scanning, a device connected to the kiosk to scan badges
